LinkedIn | GitHub

I am a full-stack Developer and musician with a data management and entry background. Coding is the magic that I can do in this world. I remember my first Git Commands and Hello World text when I started learning new platforms, which excited me to learn more. I am very proud of the ideas and projects I chose to build. In my previous experience as a Full-Stack developer, I enjoyed the backend, logical thinking, algorithm, and fetching, building API with Nod.JS. I learned a lot of tools and skills that I believe will add value to me as a developer and the development team I work with. I continued my obsession with learning adventure by learning Mendix and building some projects with my ideas to challenge myself just as I always do. From my experience at Dekra as a Mendix developer, I learned how to build functionality and solve bugs in a massive and complex application connected with more than applications. I am always motivated and enjoy it when it comes to building something, and my passion is to see the code turn into reality just like magic ... but I know how logical it is. Calling, creating API and working with List is what I love to do, and I will forever love to code from high to Low. I am ready to take up new challenging opportunities to work alongside other talented and professional developers who want to share experiences to achieve great things and build purposive products.

| Html | CSS | JavaScript | Node.Js | React.Js | MongoDB | C# | .net |

| Express.Js | Git | Vue.Js | Nuxt.Js | Postgres | Docker | New Relic |

| Analytical-Thinking | Accountable & Cooperative | Open-minded | Time management | Agile-Scrum |

Experience

ACHMEA, Zilveren Kruis, .net C# Junior Developer | January 2024 | Mart 2025 | Link

At Achmea I learned C# and .net Fundamentals and I was busy with building new functionalities and solving bugs in an existing application (Mikado) and it was an enjoyable challenge for me to be a part of TNT (Ninja turtle team) and learn new things.

DEKRA, Mendix Developer | October 2022 | October 2023 | Link

Building new functionalities and solving bugs in an existing big application for the DEKRA Automotive (ACE) team was an enjoyable challenge for me. Going live and solving bugs and issues of the connections with third-party services (REST API and web services) was the biggest challenge. I learned how to deal and work with existing applications that connect with more than one other application. Besides that, I learned a lot from working agile in the DEKRA development team.

CitizenM, Intern Tech Specialist | November 2021 | February 2022 | Link

I learned how to work with an observability platform (New Relic one) by creating dashboards and monitors and observing all errors across the website, I enjoyed developing a function that corrects data in a database by running JavaScript code and using Postman.

The Embassies, Intern Web Developer | May 2021 | August 2021| [Link](#)

I learned how to use new technologies from creating functionalities for the website and connections with third-party services via API for business. Technologies I worked the most with are Vue.Js, Nuxt.Js, JS, Storyblock, CSS, and Tailwind. The thing I most enjoyed was creating the Embassies API on Node.Js, Sequelize, Postgres databases, Swagger open-API, and Docker.

Syrian Bar Association, Archives manager & Data Entry | September 2000| August 2012|

It was a big challenge to work in this department where I dealt with thousands of files. Saving these files from damage was the main issue for our team. Finding them was very complicated until I came up with a plan to solve this problem with hard work and passion. I am very proud that I could contribute to this project both as a manager and team player.

Education

Low-code- Academy Bootcamp | April 2022 - June 2022 | [Link](#) | [Certificate](#)

Mendix Developer Bootcamp, Low-code Academy is a school that teaches Mendix by creating an application and achieving Scrum and Agile Methodology.

- Process Modelling
- Agile Working
- ALM
- Team Server
- Versioning
- Branching

- Security Verification
- Account handling
- Frontend development
- Microflow Modelling
- Data Binding
- Styling

- Data Processing
- Data Generation
- Querying
- Integration Rest, Excel, Filing-Modelling Best Practicing
- Domain modelling

HackYourFuture, Web Development | Oct 2019 - Oct 2020 | [Curriculum](#) | [Certificate](#)

Full Stack Web Development: HackYourFuture is a coding school that gives an opportunity to build and improve programming skills such as HTML, CSS, JavaScript, Node.Js, React.Js, Databases and problem-solving skills, in the final project, you apply all that you learnt scrumming with the team achieving agile methodology.

Development projects

Star Wars | Oct 2020 | [Demo](#) | [Source](#)

I chose to build this website to challenge myself and also doing something I love. Fetching an API is my thing, so I came up with a website where users can search for information about Star Wars movies and characters, and when I finished with API fetching I decided to add some additional features like rating function for movies and a memory cards game with Star Wars characters images. The application was made with REACT (Using SWAPI https://swapi.dev/).

Math Quiz | Oct 2020 | [Demo](#) | [Source](#)

I build a web application which kids could use for learning mathematics in a fun way, so I came up with this website where they can play math collection for 3 levels, with an admin user who can add more math questions. The application was made with MERN stack (MongoDB, Express.Js, React.Js, Node.Js).

HackYourPlaces | Sep 2020 | Source
This is a website I built which lets users share places they visited, add friends, search for places, view places on the map and rate places. The application was made with MERN stack (MongoDB, Express.Js, React.Js, Node.Js).

Courses

- INTERMEDIATE Mendix Developer Certification

- RAPID Mendix Developer Certification

- Professional Scrum Master I

Certificate

- MERN Stack Front to Back (React.Js, Node.Js, Express.Js & MongoDB)

Certificate of Completion
Certificate of Completion

Languages

• Arabic	(Native language)
• English	(B2)
• Dutch	(B1)
• Turkish	(A1)

Hobbies

Listening to music, Playing Guitar and Lute, tapping beer, Video games, Collecting Metal Viny LP, post stamps & Lord of the rings Figures, Puzzle, Billiards, Sculpting, Crochet, Diving.
